

## GGP Wins 2013 Polsinelli Innovation Competition

### *Green Chemistry Significantly Reduces Fresh Water Use in Oil Production*

**CHICAGO, IL – September 10, 2013** – Global Green Products, LLC (GGP), a leader in green and sustainable chemistries, has been chosen as the winner of the 5th Annual Polsinelli Innovation Competition, a leading Midwest competition for entrepreneurs developing innovative processes, products and services in the clean and green technology industries.

The innovation competition focuses on excellence in technology, clean technology innovation, products and services across the Midwest and beyond. The Polsinelli Innovation Competition is a preeminent venue for entrepreneurs in new clean and green technologies to present venture-ready business ideas to the scientific and research communities and potential investors. Submissions are judged by a panel of experts representing regional universities, venture capitalists and clean tech business executives.

GGP markets a series of catalyzed polymer based products that are environmentally friendly, biodegradable, non-hazardous, non-toxic, hypoallergenic and easy to use. These catalyzed polymer products are made from a natural ingredient, L-aspartic acid, using benign processes that are also environmentally safe. GGP also provides technical service capabilities to help customers use the most effective products to optimize their operations. GGP's patented "end-cap" polymer technology represents second generation products and show outstanding performance and biodegradation properties.

### **About Global Green Products**

Global Green Products provides "green" alternatives to traditional chemical products for use in the energy and industrial water treatment markets. GGP's award-winning chemistry and experience in water treatment is unparalleled. More information on the company's products, notable achievements, key leadership, and history can be found at [globalgreenproducts.com](http://globalgreenproducts.com).

### **Polsinelli**

Serving corporations, institutions, entrepreneurs and individuals, our attorneys build enduring relationships by providing legal counsel informed by business insight to help clients achieve their objectives. This commitment to understanding our clients' businesses has helped us become the fastest growing law firm in the U.S. for the past five years, according to the leading legal business and law firm publication, The American Lawyer. Our more than 660 attorneys in 17 cities work with clients nationally to address the challenges of their roles in health care, financial services, real estate, life sciences and technology, energy and business litigation. The firm can be found online at [www.polsinelli.com](http://www.polsinelli.com).

### **Midwest Research University Network**

The Midwest Research University Network (MRUN) is a commercialization collaborative focused on fostering the formation and growth of high tech start-ups in the Midwest. MRUN members include individuals engaged in venture formation at universities and research institutions, investors, entrepreneurs and those who help them. All are either in, or interested in, the Midwest. The MRUN community helps members make connections

informally to solve common problems in startup business development including, angel and seed-stage financing, placement of management talent and opportunities for collaboration. MRUN is built around the idea that working together regionally in new business formation can accomplish more than working independently locally. For more information: [www.mrun.us](http://www.mrun.us).

### **Global Midwest Alliance**

Global Midwest Alliance is the only business-led economic development group for the Midwest region. The Alliance facilitates collaboration among key stakeholders to provide access to global business opportunities to the Midwest and realize economic value from existing world-class assets in the Midwest. The Alliance focuses on programs and platforms that help high growth companies develop and expand markets for businesses based in the Midwest, encourage and assist international business activities in the region, and integrate business, financial and scientific resources for successful commercialization of technology in the Midwest. For more information, visit [www.globalmidwestalliance.org](http://www.globalmidwestalliance.org).
