

Global Green Products

Global Green Products is an international “green chemical” company that provides cost-saving solutions to complicated upstream oil and gas problems while answering the growing global concern about the environmental impact of the chemicals used in our industry.

Judges' Comments:

“ The Water-Tek technology has saved millions of dollars for Bakken operators in 2015 and conserved over 2 million barrels of fresh water. Incredible cost saving especially important in the current price environment.

“ Finding innovative ways to reduce the need for fresh water during maintenance activities is critical for long term success of any basin. GGP used their technical expertise to find a solution to a problem that operators face. The statistics on their success should be applied in multiple areas.

Led by top innovators in the field of green chemistry, Global Green Products provides environmentally-responsible alternatives to traditional chemical products that lower costs, increase efficiency and promote stewardship of natural resources around the world.

GGP plays an integral role in our customers' success in implementing principles of water stewardship. We understand that green solutions are not real solutions until they are cost-effective solutions. Our

green polymer products replace traditional chemicals while enabling our customers to meet fresh water usage regulations and to reduce the amount of treated water requirements. GGP is committed to developing products for our customers that increase their profits and reduce their environmental impact as they address the challenges of meeting global energy and natural resource needs. It's truly innovative chemistry for environmental stewardship.
